Summary

I'm a highly motivated and skilled Junior UX/Product Designer with a passion for creating exceptional user experiences. Experienced in front-end development and proficient in a range of design tools and technologies.
I am committed to delivering innovative solutions that enhance user satisfaction and drive business growth. My strong ability to collaborate with cross-functional teams, translates complex requirements into intuitive designs.

Work Experience

Netherlands: **2019 - 2023**

- IT Industry:
  - ### *Front End Developer at Logichainge*
    I was responsible for designing and developing the Groupage Transport Management System (TMS) module within their new Software as a Service (SaaS) platform. This involved creating front-end flow, wireframes, final designs, and integrating them with back-end API endpoints. My role focused on delivering high-quality, scalable code to automate and streamline groupage transport management for logistics professionals.

- Logistics Industry:
  - Returns processor for DSV.
- Hospitality Industry:
  - Housekeeping position at Van der Valk Venlo.

Spain - Chile: **2009–2019**

- Hospitality Industry:
  - Worked in managing positions as a sommelier and a field manager with people under my command and the specific tasks for such positions.

Education

Fontys Hogeschool Eindhoven

HBO - ICT, Media Design · (2021 - 2025)
